## Kaelus Launches New Website with Social Media

### Kaelus announces the launch of their new website [www.kaelus.com](http://www.kaelus.com)

Centennial, CO -- Kaelus is pleased to announce the launch of [www.kaelus.com](http://www.kaelus.com). The newly designed website presents Kaelus' full product portfolio in one easy to navigate location.

Over the last 16 years, Kaelus has built an unrivaled reputation for consistently delivering exceptional products supporting the wireless RF industry. Kaelus continues to enhance this through exceptional customer service, training, enhanced online communications, and much more. The website and social media pages will simplify the way we interact with the wireless industry by allowing users to engage with us from various channels.

A few of the new website features include high-level and targeted product search, easily identify Kaelus locations and partners, online registration for training and links to all of our social media pages.

"Our goal was to provide visitors easy access to all products and solutions offered by Kaelus." states Jacqui McLaughlin, President of Kaelus. "We are thrilled to present visitors a redesigned online presence that reflects the quality the wireless industry has come to expect from us."

#### About Kaelus

Kaelus [www.kaelus.com](http://www.kaelus.com), a Smiths Interconnect business formed by the combination of Summitek Instruments, Allrizon Communications, Triasx Pty Ltd and the commercial division of TRAK Microwave Ltd, designs and manufactures a wide range of innovative RF and microwave solutions for the wireless telecommunications sector. Products include specialized filters, combiners, tower mounted amplifiers, Passive Intermodulation (PIM) test solutions, radio link diplexers, ferrite isolators and circulators. Kaelus' experience and understanding of the radio environment enables it to excel by developing technically differentiated offerings that improve network performance.

### **About Smiths Interconnect**

Smiths Interconnect [www.smithsinterconnect.com](http://www.smithsinterconnect.com) is a leader in technically differentiated electronic and radio frequency products that connect, protect and control critical systems for the wireless telecommunications, aerospace, defense, space, medical, rail, test and industrial markets. It is part of Smiths Group [www.smiths.com](http://www.smiths.com), a global leader in applying advanced technologies for markets in threat and contraband detection, energy, medical devices, communications and engineered components. Smiths Group employs around 23,000 people in more than 50 countries.
