## Galtronics Completes Acquisition of Kaelus AB, Creating a Unified End-to-End RF Portfolio

**Toronto, Ontario, Canada May 29<sup>th</sup> 2026.** Galtronics, a Baylin Technologies Inc. subsidiary, today announced the completion of its acquisition of Sweden's Kaelus AB. The combination of the Galtronics and Kaelus businesses creates one of the industry's most comprehensive end-to-end RF solution portfolios.

Kaelus brings new capabilities in Base Station Antennas including beam through technology, RF Conditioning equipment, GNSS Synchronization including anti-jamming technology, and world class Test and Measurement equipment.

“This acquisition brings together highly complementary technologies and expertise,” said Leighton Carroll, Chief Executive Officer of Baylin Technologies. “By expanding our capabilities, we are enabling customers to deploy next-generation wireless networks with greater speed, confidence, and performance.”

Peter Sandberg, Chief Executive Officer of Kaelus, added, “Joining forces with Galtronics and Baylin strengthens our ability to serve customers as a more strategic, long-term partner. With a broader portfolio and deeper resources, we are well-positioned to deliver comprehensive RF solutions in an increasingly AI-connected world.”

### What Customers Can Expect

- **One partner, broader capabilities:** Integrated solutions spanning antennas, RF conditioning, and test & measurement—supporting faster, more efficient network rollouts
- **Accelerated innovation:** Expanded engineering resources focused on next-generation RF solutions and continued product investment
- **Stronger global support:** Existing customer contacts remain unchanged, now backed by expanded global capabilities across North America, Europe, and beyond.
- **Brand continuity:** Kaelus will operate as “Kaelus, a Galtronics company,” maintaining the strengths and recognition of both brands

- **Operational continuity:** Kaelus will continue with its current management team and full P&L responsibility
- **Contract & supply assurance:** All existing contracts remain in effect, with procurement integration managed transparently over time.

## ABOUT KAEUS

---

Kaelus is a global RF technology manufacturer supplying products essential to wireless networks, defence systems, and telecommunications infrastructure. Its portfolio includes beam-through antennas, RF conditioning solutions, GNSS synchronization and anti-jamming products, and industry-leading PIM test & measurement equipment. Kaelus maintains global operations with headquarters in Sweden and a presence across North America, Europe, and Asia-Pacific. For more information, visit [www.kaelus.com](http://www.kaelus.com).

## ABOUT GALTRONICS

Galtronics, a wholly owned subsidiary of Baylin Technologies, designs and manufactures antenna solutions to solve the most complex connectivity challenges worldwide. The company combines engineering, customer collaboration, and technology innovation to deliver high-quality, critical connections. When connectivity counts, Galtronics delivers. For more information, please visit [www.galtronics.com](http://www.galtronics.com).
